WINTER SAFETY

~ POISON PREVENTION ~

TIPS TO STAY POISON SAFE THIS WINTER:

- Never operate a generator in an enclosed space such as a garage or basement.
- Do not use charcoal or gas grills, stoves, or ovens to heat your home.
- Road salt used on driveways and sidewalks can be harmful to a pet or child if eaten.
- Keep antifreeze away from children. Antifreeze tastes sweet, but can be harmful if eaten.
- Winter may bring about an increase in cold or flu symptoms. Be cautious when taking cough and cold medicine and avoid mixing products or taking in very high doses.
